

9. 14. DEC. - ROBUST METHODS

Exercise 26. *In section of the Scottish Hills waste book you find the output of Atkinson's forward regression, applied to the Hills data. (Section 8. Robust Forward Search)
Comment the output, and compare to the information you learned from "classical" leave one out diagnostics.
Based on both, how would you summarise a report?*

Exercise 27. *Use the Box/Cox transformations on the cars data set used in ??, and do a classical regression diagnostics for a transformation of your choice.
Cars93 data from MASS: data from 93 Cars on Sale in the USA in 1993.*
